

A. Application

1. Copies of all effective Rate Schedules are available for public inspection at the District's office in Modesto and on the District's website (www.mid.org).
2. Bills for electric service will be computed according to Rate Schedules adopted by the District and applicable to the class of service supplied to each customer.
3. Unless specifically provided in a Rate Schedule, all rates of the District are applicable only for service supplied entirely by the District without interconnection of the customer's facilities with any other source of supply.

B. More Than One Rate Schedule Applicable

1. When more than one Rate Schedule is applicable, the District will assist the customer or applicant by making a reasonable effort to determine which applicable Rate Schedule will result in the lowest charges for electric service. Such Schedule will be granted to applicant.
2. Any customer requesting service on an applicable Rate Schedule other than that on which the customer is being billed shall, with District approval, be billed on the Schedule requested, effective after the next billing period following the date of approval.
3. The District shall not be required to make more than one change in Rate Schedule for any customer within twelve (12) consecutive months unless a new applicable Rate Schedule is approved or the customer's operating conditions have changed so as to warrant a change in Rate Schedule. Any customer served on a Rate Schedule with an annual minimum charge will not be permitted more than one change in Rate Schedule in any twelve (12) consecutive months.
4. The District will take measures as may be practicable to inform all customers who may be eligible for service under new or modified Rate Schedules.
